It's All About  
**Engagement!**

## TimerTools™

Projectable Timers for Teachers and Trainers

Imagine this: You are doing a PowerPoint presentation and with one click, your whole screen turns into a huge hourglass to let your learners know how much time they have left to discuss an issue. Or, your class computer rings a “Time’s Up!” alarm letting students know it’s time to switch gears. Excitement mounts as your class or workshop participants race against the TimerTools

stopwatch, attempting to break their prior record for a challenging task. It’s all possible with TimerTools. TimerTools is the Swiss army knife for teachers and presenters: 18 essential tools in one! Whether you are presenting to a small class or a huge audience, TimerTools is your perfect solution for every presentation need: hourglass, analog clock, digital clock, alarm clock, multiple customizable alarms, seconds countdown timer, turn timer, interval timer, digital stopwatch, analog stopwatch, and split timer. Each attractive, scalable, customizable timer tool is super easy to use. Ideal for computer presentations or to turn your whole computer into a suite of powerful timing tools.

Site Licenses Available!

### Timers for Every Timing Need!

18 different timers

Ideal for projectors and interactive whiteboards

Hourglass, countdown, turn timer, and more!

## SelectorTools™

Projectable Selectors  
for Teachers and Trainers

**K**ee everyone actively involved! Click a button to randomly select a student in the class by name. Spin a spinner to pick which teammate will share the team's answer. Roll a die to pick a student on each team to go first. Press Go and randomly select the next team to present. SelectorTools offers 15 attractive selectors: Color Selector, Color Spinner, Name Selector, Next Team, No Repeat Selector, Number Selector, Partner Picker Spinner, Role Assigner, Role Timer, Roll the Die, Student Selector Spinner, Student & Team Selector Spinners, Team Selector Spinner, Team Sequencer, and Who's Up? This collection of selectors will give you the tools you need to crank-up active engagement. Instead of calling on one student at a time, pick one student in each pair or team to answer or perform. With random selectors, anyone can be picked at any time, so tuning out is not an option. Pump up the interaction in your classroom and keep everyone involved. Selecting students and teams has never been so fun or easy.

Next Team, No Repeat Selector, Number Selector, Partner Picker Spinner, Role Assigner, Role Timer, Roll the Die, Student Selector Spinner, Student & Team Selector Spinners, Team Selector Spinner, Team Sequencer, and Who's Up? This collection of selectors will give you the tools you need to crank-up active engagement. Instead of calling on one student at a time, pick one student in each pair or team to answer or perform. With random selectors, anyone can be picked at any time, so tuning out is not an option. Pump up the interaction in your classroom and keep everyone involved. Selecting students and teams has never been so fun or easy.

Pick a partner to share

You can even select students by name!

## TeamTools™

Create and Manage Teams Like a Pro

Let's face it, forming good cooperative learning teams can be a chore. Not any more! To create effective teams, we must juggle a lot of variables: We want teams of four, but must form some teams of three or five to handle "extra" students. We want two boys and two girls per team, but when we run out of balanced sex teams we want same sex teams so the solo boy or girl is not given too much or too little attention. We want a high, high-medium, low-medium, and low ability student on each team to optimize tutoring and achievement. Creating teams can be a brain-racking, time-consuming process. Now, you simply click a button. TeamTools takes your class info and recommends teams for you. If you like the recommended teams, you save, print, or display them for your class. If you're not happy with the suggested teams, you push a button to try again, or fine-tune the teams yourself by moving students around. Forming flexible groups for differentiated instruction is also a snap. TeamTools gives you six ways to form teams, six ways to form pairs, and two ways to split the class into two teams. You can use TeamTools for up to 8 different classrooms. Create and manage teams like a pro with TeamTools!

Form balanced cooperative teams with a click!

## DecisionTools™

Questioning and Decision Making  
Tools for Teachers and Trainers

**A**sking questions and making decisions just got a whole lot more interesting and effective with this suite of visual tools. With 13 tools, you have the perfect tool for every group question and decision. Display true/false, multiple choice, yes/no, agree/disagree, and survey questions for your students or staff. Enter the results, and click the Go button. DecisionTools

calculates the totals and percents then displays bar and pie graphs in vibrant colors. You get the power of class responders without the big price tag. Vote as a group and display the results with beautiful graphs. Make a group decision without creating winners and losers. Rank items as a group while respecting everyone's input. Brainstorm and prioritize ideas with an easy-to-use interface. Perform a Plus/Minus comparison by listing and rating the advantages and disadvantages of any idea. DecisionTools gives you an eye-pleasing interface that leads you through all these questioning and decision-making processes. From super-simple yes or no decisions to sophisticated feature comparisons, DecisionTools has you covered! So many tools. So easy to use.

# Numbered Heads Together™

The Quiz Show Review Game for Teams

Students love game show reviews. And students love teamwork. We've put them together in this game show software that your students will ask for time and again! You simply type or paste in your questions or problems for any subject and you're ready to play. It's so easy to use, you can set up a game in just minutes, plus you can save all your games to play next period, next year, or as a refresher next week. You can use just about any type of questions: worksheet problems, review questions, test prep questions, or you can even play with thinking or trivia questions. The game randomly selects a question and leads teams through Numbered Heads Together, a longtime favorite cooperative learning review structure designed to promote teamwork and accountability for every student. Students put their "heads together" so everyone on the team can answer for the team. And since any student can be picked at any time to share the team's answer, everyone must keep tuned in to every question or problem. Unlike other review games, with Numbered Heads Together you're confident that every student is actively engaged and that everyone is learning. Put the excitement of a quiz show together with the best of instruction and you will transform any review session into a power-packed learning experience.

# Instant Engagement

Create Engagement—Instantly!

More info p.9

More info p.10

More info p.11

**C**reate engagement—instantly! Just add your own questions. Using game-like structures, Instant Engagement leads you and your students through step-by-step instructional strategies for review, thinking and discussion, idea generation, and problem solving. There are 3 different programs in this series: 1) Pair, 2) Team, and 3) Class. Each program includes three structures designed to cover the range of classroom objectives. Use Quiz-N-Show for pair review sessions to boost test scores in any subject. Use Mix-Pair-Share to have your students mix to the music and then pair up with a classmate to discuss the prompts you enter—from what they did last weekend to the Theory of Relativity. Use ThinkTank to promote higher-level thinking and in-depth discussions in teams about your curriculum. Learning becomes fun, not a chore with these interactive strategies. Good teaching is a snap! Whether you know and love Kagan Structures or you're just looking for a way to step up student engagement in your class, you now have the perfect tools to engage every student, every time.
